Based on brief, pithy quotations from Rudolf Steiner's collected works, the 'spiritual perspectives' in these volumes present core concepts on various subjects. These brief extracts do not claim to provide exhaustive treatment of the subject, but open up approaches to the complexity of Steiner's extraordinary world of ideas. Some readers will find these fragments sufficient stimulus in themselves, whilst others will use the source references as signposts towards deeper study and understanding.

## On Epidemics

### Spiritual Perspectives

*'If we can bring nothing up out of ourselves except fear of the illnesses which surround us at the seat of an epidemic, and if we go to sleep at night filled with nothing but thoughts of this fear, then we create unconscious replicas, imaginations, which are drenched in fear. And this is an excellent method for nurturing bacteria...'* – Rudolf Steiner

## On Fear

### Spiritual Perspectives

*'We must eradicate root and branch any fear and dread in our soul concerning the future that is coming towards us... We must develop composure with regard to all the feelings and sensations we have about the future; we must anticipate with absolute equanimity whatever may be coming towards us, thinking only that whatever it may be will be brought to us by the wisdom-filled guidance of the universe.'* – Rudolf Steiner

## Henk van Oort **Anthroposophy A-Z**

A glossary of terms relating to Rudolf Steiner's spiritual philosophy

Rudolf Steiner's spiritual philosophy is the inspiration for many successful initiatives in the world today, from the international Steiner Waldorf school movement to biodynamic agriculture and its increasingly popular produce. Steiner developed his philosophy in dozens of books and many thousands of lectures. His teaching contains dozens of new concepts and ideas, and as a result he had often to create his own vocabulary. In this practical volume – a companion to his *Anthroposophy, A Concise Introduction* – Henk van Oort gives concise definitions of many terms and concepts in Steiner's worldview, from the most commonplace to the more obscure.

*Anthroposophy A-Z* can be used as a reference guide, but also as a gateway into Rudolf Steiner's manifold world of spiritual ideas and concepts. Anthroposophy can be seen to be a new language – a language that can lead to the world of the spirit. It was with this awareness that Henk van Oort took the initiative to write this glossary. Ultimately, he has written the sort of inspiring handbook that he wished had existed when he first became acquainted with anthroposophy over 40 years ago.

*HENK VAN OORT, born in 1943, trained as a primary teacher before taking a Masters degree in English at the Amsterdam University. He has taught for 40 years in primary and secondary education, including class teaching in a Steiner school, teaching English, and running educational courses and seminars for teachers and parents. His interest in literature and poetry has led to his appearance at storytelling and poetry seminars, and his introductory courses to anthroposophy have proved to be highly successful. Based in Bergen N.H. in the Netherlands, Henk van Oort is married and the father of three grown-up children. He is the author of Anthroposophy, A Concise Introduction.*

## Rudolf Steiner

# Sexuality, Love and Partnership

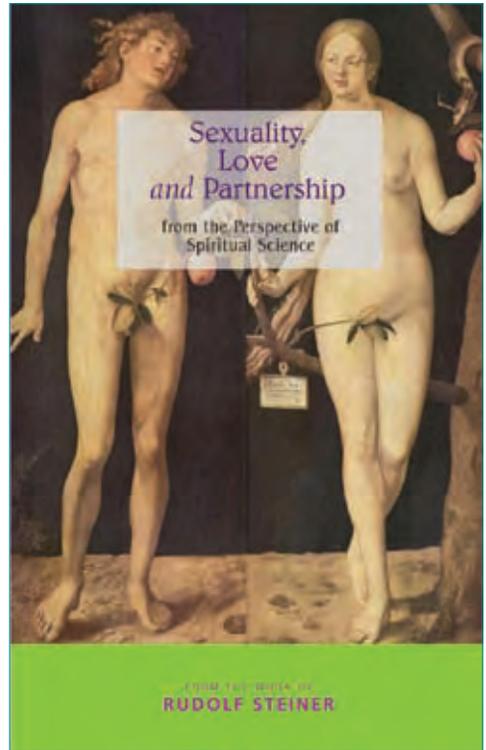

### From the Perspective of Spiritual Science

*'Rudolf Steiner presents the human soul dilemma, split into male and female attributes... but offers a path of development which will eventually lead to overcoming these – what Jung called 'individuation', a merging with the true self or true ego of the human being.'* – from the Introduction

We live in a sexualized society, surrounded by sexual imagery and content in almost every area of life. This presents us with many challenges, including an increasing blurring and confusion between love and sex; strife between men and women over their roles in society; and a consistent assault on the innocence of childhood.

Despite the sensibilities of his time, Rudolf Steiner made a huge contribution to our understanding of the complex theme of sexuality. In this freshly-compiled anthology, Steiner describes the point in evolution at which human beings split from being androgynous and single-sexed to becoming male or female. He traces the changing roles of the sexes in society, from the matriarchal past to today's patriarchal dominance. The division of the sexes brings suffering, but also the possibility of achieving higher stages of love. In the distant future, humanity can evolve sexuality into a new form, with even the possibility of reproduction being metamorphosed.

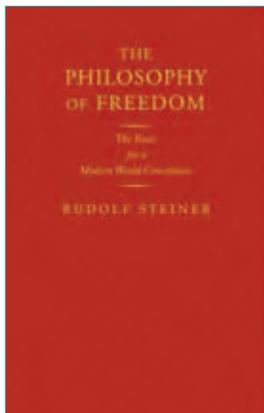

Refreshingly, Steiner is not judgemental and does not preach asceticism. He recognizes the 'all-too-human' frailty people confront in their personal lives, even in the case of great individuals such as Goethe. Sex is a necessary stage of human evolution, and the split nature of the human being is a fact of our age. Its healing will be gradual but, like Amfortas in the Grail story – whose wounded groin was a metaphor for amorous misadventure – we can all be healed through love and compassion.

## The Philosophy of Freedom

### The Basis for a Modern World Conception

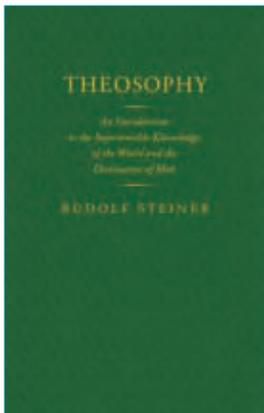

Given his energetic involvement in practical initiatives and extensive lecturing, Rudolf Steiner had little time to write books. Of those he did write – belonging almost entirely to the earlier years of his work – four titles form an indispensable introduction to his later teaching: *The Philosophy of Freedom*, *Theosophy*, *Knowledge of the Higher Worlds* and *Occult Science*.

The first of these books deals with fundamental human questions: Are we free, whether we know it or not? Or, is our sense of freedom merely an illusion? Rudolf Steiner tackles this age-old problem in a new way. By taking account of our own activity of thinking, we can know the reasons for our actions. And if these reasons are taken from our world of ideals,

then our actions are free, because we alone determine them. But this freedom cannot be settled for us by philosophical argument. It is not simply granted to us. If we want to become free, we have to strive through inner activity to overcome our unconscious urges and habits of thought. In order to do this we must reach a point of view that recognizes no limits to knowledge, sees through all illusions, and opens the door to an experience of the reality of the spiritual world. Then we can achieve the highest level of evolution, and recognize ourselves as free spirits.

## Theosophy

### An Introduction to the Supersensible Knowledge of the World and the Destination of Man

*Theosophy* focuses on a psychology based not on the usual duality of body and mind, but on the more ancient division of body, soul and spirit. Steiner describes in detail the functions and organs of these three aspects of the human being, and the objective realms to which they belong. Just as the body derives from and belongs to the material world, so do the human soul and spirit belong to their own specific realms. These are the dimensions through which all human beings travel in the life after death, and in which – after passing the 'midnight hour' – we prepare to seek our destiny, or karma, in a new life. *Theosophy* features one of the most comprehensive and condensed of all Steiner's accounts of these realms, and of the experiences which our immortal being undergoes in passing

through them. The book ends with a chapter on the modern 'path of knowledge', in which Steiner describes the exercises through which every person can potentially develop the latent powers of perception which are necessary for a knowledge of metaphysical worlds.

### Knowledge of the Higher Worlds How is it Achieved?

Rudolf Steiner's fundamental handbook for spiritual and personal development has grown more modern as time has passed, although his methods remain clearly distinguishable from the many others now in circulation. For one thing, Steiner's path of spiritual growth is based on the clarity of thought normally associated with scientific research. Rather than denying clear thinking, his aim is to extend it beyond its present limitations. Secondly, Steiner recognizes – as in all genuine disciplines – that the path to spiritual experience is an arduous and dangerous one, calling for self-control in thought, word and deed. Human beings comprise a unity, and we cannot develop knowledge without a corresponding development in feeling and will. *Knowledge of the Higher*

*Worlds* begins with the conditions required for personal development, and guides us through the stages of initiation, its practical aspects and its effects.

### Occult Science An Outline

The anthroposophy of Rudolf Steiner is not a theoretical system, but the results of research based on direct observation. As Steiner's research was so vast and conducted over such a long period of time, no single book can be said to contain the whole of his spiritual teaching. However, of all his books *Occult Science* comes closest. Steiner even referred to it as 'an epitome of anthroposophical spiritual science'. The book sets out, in systematic order, the fundamental facts concerning the nature and constitution of the human being and, in chronological order, the history of the universe and man.

Whereas the findings of natural science are derived from observations made through the senses, the findings of spiritual science, or anthroposophy, are 'occult' inasmuch as they derive from direct observation of realities hidden to everyday perception. A substantial part of *Occult Science* is taken up with a description of the preliminary training which is necessary to make such spiritual observations.

Rudolf Steiner

## Inner Nature of Music and the Experience of Tone

*'A tone is at the foundation of everything in the physical world.'*

This is one of many astonishing statements made by Rudolf Steiner in this collection of seven lectures on the inner realities of music. These lectures are an unusual treasure as they are the only two groups of lectures that Steiner gave primarily on music, other than the lecture cycle for the tone eurhythm course, *Eurhythm as Visible Music*.

In the first group of three lectures, given in 1906, Steiner explains why music affects the human soul so powerfully. Music has always held a special position among the arts because it is the only art form whose

archetype, or source, lies not in the physical world, as with architecture, sculpture and painting, but purely in the spiritual world—the soul's true home. Music thus directly expresses through tones the innermost essence of the cosmos, and our sense of well-being when we hear music comes from a recognition of our soul's experience in the spiritual world.

In the remaining lectures, given in 1922–23, Steiner discusses our experience of musical intervals and shows how this experience has undergone profound changes during the course of evolution. The religious effects of music in ancient times and the union of music with speech are considered, as well as the origin of musical instruments out of imaginations that accompanied singing. New insights are offered on the nature of the major and minor modes and on future directions of musical development.

## Rudolf Steiner's Intentions for the Anthroposophical Society

The Executive Council, the School of Spiritual Science, and the Sections

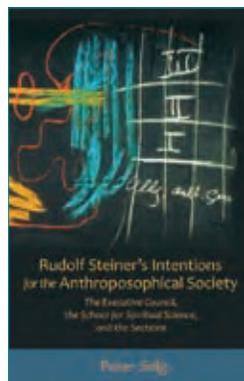

Written both in commemoration of the 150th anniversary of Rudolf Steiner's birth and in the context of the long-standing, episodically erupting and ongoing confusion surrounding the mission and task of the Anthroposophical Society, Peter Selg seeks to recover what has perhaps been forgotten or overlooked in Rudolf Steiner's own words and life. He does so by describing, clearly and objectively, the historical background of Steiner's vision of the 'civilizational task' of Anthroposophy and how he had hoped it might be accomplished.

This book has two parts. First, the author offers a lucid description of the development and gradual sharpening – in the face of the crisis of Western culture epitomized by World War I and its aftermath – of the vision of spiritual science as a truly Michaelic task for the Michael Age. In part two, Peter Selg takes up the events following Rudolf Steiner's death, outlining deftly and subtly the struggles and developments that ensued, commenting tactfully on the questions and perspectives that arose and continue to arise.

*Rudolf Steiner's Intentions for the Anthroposophical Society* is a book for all those who care about the reality and future of Anthroposophy.

## Initiative

A Rosicrucian Path of Leadership

Torin Finser takes on some of our contemporary challenges and proposes new solutions. Rather than simply 'kicking the can down the road', as often happens with issues such as sovereign debts, Middle East conflicts and environmental issues, Finser calls for individual initiative. Drawing on a variety of rich cultural and spiritual traditions, he makes the case for social change that begins within. To do so, one must first access resources that support initiative and innovation. Key questions discussed in this book include:

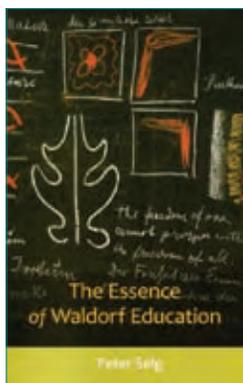

- How is it possible to live a spiritual life in our materialistic age?
- Can an individual person still make a difference?
- How can we use a whole-systems approach to innovation?
- How can planetary wisdom help us find appropriate leadership styles?
- What are the inner conditions needed to work with the transcendent Self?
- In the swirl of multi-tasking, how can we find moments of solitude and reflection?

Today's world needs people of initiative – those willing to become the change that is so desperately needed. This book offers a wake-up call for inspired leadership.

## The Essence Of Waldorf Education

Schools reflect the state of society. If society is materialistic, competitive, egoistic, technological and without concern for human values and long-term thinking, our schools will tend to reflect those values. However, what if education were about something else? What if education were about the future? What if education were about nurturing a new generation of human beings who were integrated in body, soul and spirit, able to think for themselves and have the capacity to love? Perhaps the world would change. The Waldorf school, initiated and guided in 1919 by Rudolf Steiner, was conceived with precisely such an end in view.

In this passionate, inspiring, and moving book, Peter Selg returns to the original impulses behind the first Waldorf school to show their continuing validity. Waldorf Education is not a theory but a living reality, and Selg brings this reality to life before us through the biography of the first Waldorf school. We learn to see this education in a new way – as a healing model of what education might become if the primary relationship, the inner core of a school, is the free relationship between teacher and student.

## Group Meditation

‘This book comes from joy.’ With these words, Michael Lipson begins his offering, the fruit of many years of study and practice. *Group Meditation* is both a practical introduction to the power of meditation in groups and a challenging review of the meaning of meditation itself.

Continuing themes he introduced in his earlier book, *Stairway of Surprise*, Lipson shows how ordinary capacities such as thinking and feeling can be intensified without limit in a group setting, so that these capacities transmit the most intimate truths of nature and being. There are aspects of the world that are too vast to be borne by one person alone; to approach them, a group is needed. Theme-based meditation, as Lipson demonstrates, links those practitioners together in a special kind of community that can endure greater light.

With repeated exercise, either in isolation or in community, attention oriented toward a high meaning grows more concentrated, more intense. It frees us to drop our self-concern and, instead, take in the full shock of our shared existence on Earth. It helps us, finally, ‘to be, ourselves, the news from heaven’.

*Edited by Peter Stebbing;  
Paintings by Gerard Wagner*

## The Goetheanum Cupola Motifs of Rudolf Steiner

Gerard Wagner's paintings of Rudolf Steiner's Goetheanum cupola sketches bring to life what otherwise would have been lost to the fire that destroyed that great building. Wagner re-created those archetypal motifs in new ways over a period of decades.

This book points to the historic and spiritual importance of the first Goetheanum building. Rudolf Steiner's lecture on October 25, 1914, and his lecture on the paintings of the small cupola on January 25, 1920, are published here in English for the first time, along with colour photographs from 1922. Also included are the little-known coloured etchings of the Goetheanum window motifs made by Assya Turgenieff with Rudolf Steiner, as well as other centrally important contributions to an understanding of this new direction in art.

Though the main emphasis is on visual examples, the book achieves something more than simply cataloguing these works of art. The book conveys, too, a sense of the artistic process itself. Thus, Gerard Wagner's observations have a special relevance. In addition to the two lectures by Rudolf Steiner and the paintings by Wagner, *The Goetheanum Cupola Motifs of Rudolf Steiner* presents essays from Peter Stebbing, Louise Clason, Assya Turgenieff and Gerard Wagner.

## Easter

### Rudolf Steiner's Watercolor Painting

This full-colour book explores the deep meaning of Rudolf Steiner's watercolour *Easter* (or *Three Crosses*) painted in April 1924. The reader is led to contemplate the profound mysteries of not only colours and the sense world, but also the divine, cosmic, human invisible reality lying behind them and manifested in the unique event we celebrate as Easter.

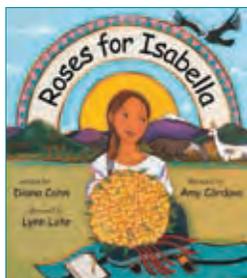

At first, the colouring and composition of the painting seem relatively simple. But the longer one meditates upon it, questions begin to arise: Why did Rudolf Steiner use the rainbow sequence of colours?; Why are the crosses so small, seen only from a distance?; Who or what are the white figures 'below the earth'?; What is the painting really about?

Answering these questions, artist Angela Lord draws on a wide range of anthroposophic and other sources to illuminate the enormous mystery of Easter itself. She delves into the mysteries of colours as Steiner uses them—from the polarity of red and black, the contrast of orange and green, the radiance of yellow and blue and the enigmatic presence of white and violet, to an experience of the painting as a beautiful rainbow.

# Roses for Isabella

*This morning, Cotacachi, the volcano that watches over my village, is veiled in clouds of white, as soft as the wool my grandfather spins.*

*After breakfast, I get ready to walk to school. Mama weaves my hair into a long braid and ties it with a brightly coloured ribbon.*

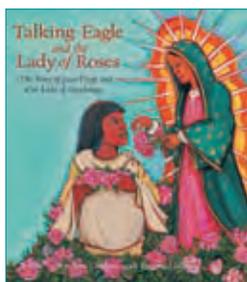

*Papa watches me put my writing book into my schoolbag. He says with a big smile, 'Isabella, you are our family's first writer'.*

*Roses for Isabella* invites us to experience life in Ecuador through the eyes of a young girl who keeps a journal and loves to write. We learn about Isabella's parents who work on one of the hundreds of farms growing beautiful roses that are sold all over the world. But not all of these farms are fair to workers and kind to the earth. Through Isabella, we learn how her family's life changes for the better when her parents find work at a Fair Trade farm.

Written by award-winning author, Diana Cohn and brilliantly illustrated by award-winning artist Amy Córdova, *Roses for Isabella* will touch the hearts of children and parents, as well as introduce them to the cultural traditions of Ecuador.

# Talking Eagle and the Lady of Roses

## The Story of Juan Diego and Our Lady of Guadalupe

Long ago, in a small village in old Mexico, a baby boy was born. A child of the Great Eagle Clan, he was named Talking Eagle. He was a kind boy and a dreamer of visions, and like the eagle, he could rise above and see things that others could not. He loved to wander alone among the hills, and was always the first to greet the dawn, to find the newborn fawn in its secret resting place and gather the wild and glorious roses of Castilla that dotted the hillsides near his village.

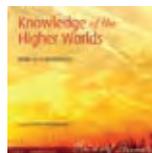

Many years before, from the faraway land of Spain, men in long robes, who called themselves Brothers of St Francis, came to the land of the Nahuas. They brought with them the lovely roses of Castilla, and they told wondrous stories of the Son of the Great Creator, the one they called the Lamb. The holy stories etched deep and vivid pictures in Talking Eagle's mind.

This is the traditional story, told simply and elegantly, of how Juan Diego meets the beautiful Lady on a windswept hilltop in December and carries her message to the disbelieving bishop.

## Who was Rudolf Steiner?

Rudolf Steiner (1861-1925) called his spiritual philosophy 'anthroposophy', meaning 'wisdom of the human being'. As a highly developed seer, he based his work on direct knowledge

and perception of spiritual dimensions. He initiated a modern and universal 'science of spirit', accessible to anyone willing to exercise clear and unprejudiced thinking. From his spiritual investigations Steiner provided suggestions for the renewal of many activities, including education (both general and special), agriculture, medicine, economics, architecture, science, philosophy, religion and the arts. Today there are thousands of schools, clinics, farms and other organizations involved in practical work based on his principles. His many published works feature his research into the spiritual nature of the human being, the evolution of the world and humanity, and methods of personal development. Steiner wrote some 30 books and delivered over 6,000 lectures across Europe. In 1924 he founded the General Anthroposophical Society, which today has branches throughout the world.

## How to use this catalogue

If you are new to the work of Rudolf Steiner, you will most likely feel overwhelmed and perhaps confused by the amount of material available in this catalogue. While Steiner wrote a number of books, the bulk of the volumes here contain transcriptions of lectures he gave.

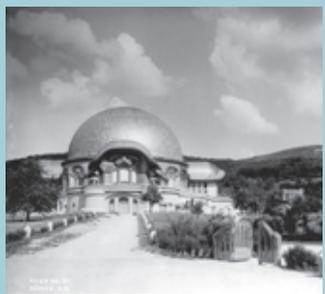

Where to start? Many people feel most comfortable beginning with the books that Steiner intended as overviews of his work, sometimes referred to as his 'basic' or 'fundamental' books — see *Knowledge of the Higher Worlds*, *Occult Science*, *Theosophy* and *The Philosophy of Freedom* (each available in at least two different translations!) on page 13. Others feel happy simply to begin with a volume of Steiner's lectures. Here, one can refer to the Contents list on p. 2 for the different subject-areas that may be of interest. Alternatively, some readers will prefer a book by many of the other authors listed separately under the different subject-areas. A good number of these titles are introductory in nature.

Longer descriptions of the books can be found on our website [www.rudolfsteinerpress.com](http://www.rudolfsteinerpress.com).
